	Handling deletion of the user	http://localhost:8089/api/v1/users/:l
	rianamig defection of the ase.	<u>d</u>
		DELETE
		http://localhost:8089/api/v1/users/:i
		<u>d</u>
SearchResult.vue	Displaying list of search results	GET
	made by search component.	http://localhost:8089/api/v1/parking
	Fetching all parking slots that	= slots?latitude={latitude}&longitude={
	are 1 km away from entered	longitude}
	point	iongitude)
SignIn.vue	Handling user authorization	POST
	3	http://localhost:8089/api/v1/auth/a
		<u>uthenticate</u>
SignUp.vue	Handling user registration	POST
		http://localhost:8089/api/v1/auth/re
_		gister
App.vue	Main component	
	Contains header and router- view	

Checkpoint 3:

Frontend

Roles	Description
GUEST	Display sign in, sign up forms.
	Can use search bar to find parking slots
USER	Cannot open sign in, sign up forms
	Can open and delete profile
	After searching parking slots and process the booking of the selected slot
LANDLORD	Cannot open sign in, sign up forms
	Can open and delete profile
	After searching parking slots and process the booking of the selected slot
	Can fetch, create, delete his parking slots
ADMIN	Cannot open sign in, sign up forms
	Can open and delete profile
	After searching parking slots and process the booking of the selected slot
	Can fetch all users, modify and delete them
	Can fetch all parking slots, modify and delete them

Backend

Roles	Description
USER	Endpoints with USER in JWT – SecurityConfiguration File – see free slots, is able to book
LANDLORD	Endpoints with LANDLORD in JWT – SecurityConfiguration File – can create slots
ADMIN	Endpoints with ADMIN in JWT – SecurityConfiguration File – makes operations for internal communication for services, manage users and slots
OPEN	Endpoints with /auth - are open for everybody, location is open for everybody

In this case, we covered both frontend and backend with security. Additionally, we added API Gateway, used Eureka, OpenAPI documentation for services.
